DETAILED ACTION

1. Claims 1-6 and 11-16 are under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 112, 1st Paragraph

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
3. Claims 1-5 and 11-15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants' arguments filed April 19, 2004, have been fully considered but they are not persuasive. Applicants' position is that the specification describes human and yeast separases and that the prior art discloses separases from other biological sources including *C. elegans*, *E. nidulans*, *D. melanogaster*, and *A. thaliana*. Applicants argue that the specification discloses separase peptide substrates of SEQ ID NO: 9, SEQ ID NO: 10, and SEQ ID NO: 12. The Examiner respectfully disagrees in part with Applicants' position for reasons of record as supplemented below.

While separases from other biological sources were known prior to the filing of the instant application, the claims are genus claims that encompass any substrate for use in the recited method for identifying compounds that inhibit the proteolytic activity of separase. The scope of the claim includes many substrates with widely differing structural, chemical, and physical characteristics, and the genus is highly variable because a significant number of structural differences between genus members is permitted.

The disclosed peptide substrates consisting of the amino acid sequence of SEQ ID NO: 9, SEQ ID NO: 10, or SEQ ID NO: 12 is not representative of the genus of separase substrates since genus members include other proteins or peptides that have different amino acid sequences and structures.

The specification fails to provide a written description of additional representative peptide and/or protein substrates that can be used in the claimed method as encompassed by the genus claims. Applicants have failed to sufficiently describe the claimed invention, in such full,

clear, concise, and exact terms that a skilled artisan would recognize Applicants were in possession of the claimed invention. Claims 2-5 and 12-15 which depend from claims 1 or 11 are also rejected because they do not correct the defect of claims 1 or 11.

Conclusion

4. No claim is allowed.
5. Claims 6 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
